

# MA 114

- Welcome everybody!
- This lecture: Sections 5 – 10.
- Tomorrow is the first recitation. Go to the one for your section!  
Recitations are in groups of 30 and for you to
  - practice material,
  - work plenty of problems,
  - work in groups,
  - ask plenty of questions.

# MA 114 — Course Web Page

<http://www.ms.uky.edu/~heidegl/MA114S15/MA114S15.html>

- **Course calendar** (the most important document for you)
- Common syllabus (our contract!)
- Recitation worksheets (you have to bring them to recitation!)
- WebWork login
- etc.

Web page for sections 5 – 10 on handout. It contains the link to course web page.

# MA 114 – The Work

## Study Advice:

- Always be aware of the course calendar.
- Read the text in advance.
- Take notes in class and study them afterwards.
- Form study groups!
- Always do your homework! Work as many problems as you can!
- Seek help if you struggle!!! Immediately!!! Do not wait!!!
- You will need Calculus I. A lot!!!

**Work Load:** 10 – 15 hours outside class!

# MA 114 – Understanding the Material

Try to **understand** the material!

- Do not just memorize formulas and routines.
- Try to see the whole story and connect the dots.
- Ask yourself whether you understand the “why” and the “how”.
- Close your books and notes and write down the main results of the section.
- If you succeed in this, then you can make it successfully through the final. Rogue memorization leads to an overflow!
- I try to help you with this process and guide you through the material.  
You have to do your part!

More on this in the syllabus!
